

Neobond ® **Primer**

Strong bonding quartz sand primer

((

Description

Strong bonding quartz sand primer, with medium and coarse quartz sand Ideal for the adhesion improvement of mortars on smooth substrates.

Fields of application

- On smooth surfaces, such as exposed concrete, cement boards, gypsum boards and polystyrene sheets, for enhancing the adhesion of succeeding plasters, mortars, tile adhesives, etc.
- Over surfaces painted with acrylic-emulsion paints, as an adhesion bridge

Reobond® Primer Quarts primer with exceptional adhesion Yakaquasa annaps soxupric repospures The NEOTEX

Properties - Advantages

- Very strong adhesion on smooth and non-absorbent surfaces
- May be overcoated even after several days have passed from its application
- Resistant to the alkalis of the cement
- Suitable for interior and exterior use
- Ready to use and easy to apply

Colours

Light green - Terracotta

Packing

15kg, 5kg and 1kg

Certificates – Test reports

- CE certification acc. to EN 1504-2
- Test report by the external independent quality control laboratory Geoterra (No. 2023/333_36)
- Complies with the V.O.C. content requirements acc. to the E.U. Directive 2004/42/CE

Technical characteristics		
Density (EN ISO 2811-1)	1,45kg/L (±0,1)	
pH (ISO 1148)	8-9	
Adhesion strength (EN 1542)	>2,5N/mm²	
Liquid water permeability (EN 1062-3)	<0,1kg/m²h ^{0,5}	
Permeability to CO ₂ – Diffusion-equivalent air-layer thickness Sd (EN 1062-6)	>50m	

Ver. 23a 1/4

layer thickness Sd (EN ISO 7783) Consumption: 200-350 gr/m ² in one layer (depending on the layer)	ha abaquativitu of the substrate)	
· · · ·	>5m (Class II)	
Water vapour permeability – Diffusion-equivalent air-	- (-1)	

Application conditions	
Substrate moisture content	<4%
Relative air humidity (RH)	<70%
Application temperature (ambient - substrate)	+10°C min. / +35°C max.

Curing details	
Drying time (+25°C, RH 50%)	3 hours
Dry to overcoat (+25°C, RH 50%)	24 hours
* Low temperatures and high humidity during ap temperatures reduce them	plication and/or curing prolong the above times, while high

Instructions for use

Substrate preparation

The surface must be stable, clean, dry, protected from rising moisture and free of dust, oil, grease and loose materials. Any loose materials and older coatings must be removed carefully by proper mechanical or chemical means.

Application

After thorough stirring, **Neobond® Primer** is applied, undiluted, on the smooth and non-absorbent substrate, by roller or brush, in one thin layer.

Special notes

- **Neobond® Primer** should not be applied under wet conditions, or if wet conditions are expected to prevail during the application or the curing period of the product.
- If needed, Neobond ® Primer may be diluted up to 3% with water.

Appearance	Viscous liquid
Colours	Light green, terracotta
Packing	15kg, 5kg and 1kg in plastic pails
Cleaning of tools – Stains removal	By water immediately after the application. In case of hardened stains, by mechanical means only.

Ver. 23a **2 / 4**

Volatile organic compounds (V.O.C.)	V.O.C. limit acc. to the E.U. Directive 2004/42/CE for this product of category AgWB: 30g/I (Limit 1.1.2010) - V.O.C. content of the ready-to-use product <30g/I
UFI code	2C30-005V-U00F-NDGM
Storage stability	1 year, if kept in the original sealed packaging, protected from frost, humidity and exposure to solar radiation.

Ver. 23a 3 / 4

Neobond® Primer

Surface protection products

Coating

Water vapour permeability	Class II	
Adhesion strength	≥1.5N/mm ²	
Capillary absorption and permeability	W<0.1Kg/m ² h ^{0.5}	
to water		
Permeability to CO ₂	S _D >50m	
Reaction to fire	Euroclass F	
Dangerous substances	Complies with 5.3	

The information supplied in this datasheet, concerning the uses and the applications of the product, is based on the experience and knowledge of NEOTEX® SA. It is offered as a service to designers and contractors to help them find potential solutions. However, as a supplier, NEOTEX® SA does not control the actual use of the product and therefore cannot be held responsible for the results of its use. As a result of continual technical evolution, it is up to our clients to check with our technical department that this present data sheet has not been modified by a more recent edition.
